**Author:** Souder, Taylor

**Updated Oil Volume:**

**Updated Salt Water Volume:**

**Updated Other Volume:**

**Updated Other Contaminant**

**Notes:**

Arrived on site at 1430. The release of oil starts from the heater treater, runs along the access road, and continues along the road ditch about 100 ft. A couple of clay berms are in place. Hydrocarbon smell is very prevalent, along with staining. Further communication with the company is needed on cleanup.
